Related dimensions are measured to the exterior boundaries of the exterior walls and the centerline of interior demising walls and in fact vary from the dimensions that would be determined by using the description and definition of the "lot" set forth in the Declaration (which generally only includes the interior dimensions between the perimeter walls and excludes interior structural components). For your reference, the area of the lot, determined in accordance with those defined unit boundaries, is 2,750 sq ft. Note that measurements of rooms set forth in this floor plan are generally taken at the greatest points of each given room (as if the rooms were a perfect rectangle), without regard for any alcove. Accordingly, the area of the actual rooms will typically be smaller than the product obtained by multiplying the stated length times width. All dimensions are approximate and may vary from actual construction. The rooms illustrated in the floor plans depicted in this brochure are not drawn to scale. All floor plans and development plans are subject to change.
